

Executives' Association of the Palm Beaches

Open Categories

Please review this list periodically, and think about potential members you might invite to an upcoming breakfast meeting! It would be impossible to list every category of business that is currently not occupied by a member of Executives' Association of the Palm Beaches. An open category is simply any business area that is not filled by another member. To 'lock' a category, a company must demonstrate that at least 65 percent of their business is done in the specific field. A member may NOT lock a category if the business area is a secondary product or service the member company offers.
